SUMMARY

Data Analyst with hands-on experience transforming raw data into actionable business insights using SQL, Python, Excel, Power BI, and cloud data warehouses. Experienced in data cleaning, exploratory data analysis, dashboard development, and business reporting through academic projects and internships. Passionate about solving real-world problems with data storytelling and building interactive dashboards that support informed decision-making. Strong foundation in statistics, ETL workflows, and business intelligence with ongoing Master's specialization in Data Science & Analytics.

EDUCATION

Jain (Deemed-to-be University), Bengaluru

Sep 2024 – May 2026

MSc in Data Science and Analytics

Presidency College, Bengaluru

Sep 2021 – July 2024

Bachelor of Computer Application, CGPA: 8.9/10

SKILLS

Programming Languages: Python, SQL, R

Business Intelligence: Power BI, Excel, Power Query, DAX, Tableau

Data Analysis: Data Cleaning, EDA, ETL, Statistical Analysis, KPI Reporting

Databases: MySQL, MongoDB, BigQuery

Libraries: Pandas, NumPy, Matplotlib, Scikit-learn

Additional: LangChain, FAISS, LLM, Streamlit, Git

WORK EXPERIENCE

Business Analyst Intern

March 2024 – May 2024

DataMites™

Bengaluru

- Cleaned and transformed raw business data using **MySQL** and Python, reducing data inconsistencies by **30%**
- Built interactive **Power BI** dashboards to monitor sales performance, customer behavior, and regional **KPIs**, enabling faster business reporting.
- Led data **exploration** and created user stories from client cases, maintained clear communication with the team.

NLP & GenAI Intern 🔗

Feb 2025 – May 2025

NullClass

Bengaluru

- Processed and organized large document datasets for retrieval and analysis using Python.
- Built data pipelines supporting semantic search across **80,000+** research papers, improving information retrieval efficiency.
- Automated data ingestion and knowledge-base updates using **FAISS** and vector indexing techniques.
- Collaborated with mentors to optimize analytical workflows and evaluate model outputs.

PROJECTS

Ask Your Mandi Data — NL-to-SQL Analytics Tool (Live App) 🔗

- Deployed a live, publicly usable web app (**Streamlit**) where users query real Government commodity price data in plain English
- Designed a normalized 5-table schema in **Google BigQuery** from 10,000+ records to support complex multi-table JOINS
- Integrated an **LLM (Llama 3.3 70B via Groq)** with a self-healing retry mechanism that auto-corrects failed SQL using error feedback

Global Chocolate Sales Dashboard 🔗

- Built a Power BI **star-schema** model analyzing **3,300+** transactions across **6** countries, tracking \$18.6M in revenue
- Cleaned and preprocessed data by removing duplicates and imputing missing values, improving dataset reliability for analysis

- Made custom **DAX** measures (Total Sales, Sales per Box, Shipments) to track the revenue and enable cross-filtering across region, product, and salesperson
- Identified key business insights, including India's \$3.25M lead in country sales and Bars driving **49%** of total revenue

Indian Job Market Trend Analysis

- Analyzed **50,000+** job postings to identify salary trends, in-demand skills, hiring locations, and experience requirements.
- Designed an interactive **dashboard** to visualize hiring **trends**, salary insights, skills demand, and regional opportunities
- Delivered actionable insights through data visualization, enabling data-driven career and hiring decisions.

CERTIFICATIONS

Analyzing and Visualizing Data with Microsoft Power BI - Microsoft (April 2024)

IBM Data Science Professional Certificate - Coursera (October 2023)

Intermediate Machine Learning - Kaggle (April 2023)
